

What is Lexis[®] Create?

Create the perfect legal document every time.

Lexis Create is a tool within the Microsoft environment that pulls together all the legal content, tools and calculators you need to create brilliant legal documents the first time.

		Name	What does it do?	
BUILD		Calculators	Access in-built calculators to improve efficiency.	
		PDF Converter	Convert PDF to word files instantly.	
		Content Snippets	Create, store, and share reusable Snippets to users and approvers.	
		Lexis+®	Save time by accessing your Lexis+® Practical Guidance Precedent content. Insert whole or part precedents into your document.	
CHECK	ANALYSE	Incomplete Information	Identifies bracketed text, bulleted text, missing information, highlighted text and other placeholders.	
		Definition Issues	Finds definitions in your document which are defined but not used, used before defined, duplicate, not in alphabetical order, and not capitalised.	
		Citations	Identifies Cases and Legislation in the document. Automatically check their status against the Lexis+® Legal Research database.	
		Cross-Reference Issues	Checks for references which are not found in your document or incorrect.	
		Mismatch	Identifies mismatches between numbers, days of the weeks and dates.	
	REVIEW	Definitions	Highlights defined terms and definitions in your document. Easily view definitions as you work through defined terms in your document.	
		Negotiable Amounts	Highlights negotiable amounts to check in your document.	
		Identifiable Information	Flags identifiable information to be checked in your document, including names, telephone numbers, addresses, email addresses, and other contact information.
